Dear Sir/Madam,

I am writing this letter to you to apply for the position of Software trainee. I came across the position via college mail and wanted to apply for the same.

I have a degree in BE, and I have studied in the field for over 3 years at CMRIT. During my time as a student there I have learned valuable skills that appear relevant to the position desired by your company as I had taken up projects related to web application using html, css and php. Currently, I hold a total cgpa of 7.05%.

As an ambitious software trainee, with a healthy amount of interest in front end development and full stack development, I truly believe that working at your company will be an exciting and enriching experience.

I enjoy working with people, and I can also play a very good role as team player and team leader. The challenges that this position offers is big, and I am sure that with an expert team I can take these challenges head-on.

Thank you for your time and for considering me as a candidate. I have attached my resume and mentioned the complete personal and professional details for any more details.

Yours sincerely,

Yeshashwini R
